WORK EXPERIENCE

[Daisen Technology Ltd.](#) *Software Developer*

01//2023 – present

As a frontend developer, responsible for designing and implementing robust, **scalable** and **reusable** web interface. I collaborate with cross-functional teams to deliver **optimized** solutions for japan-based client projects. My role focuses on creating more **efficient, reusable, cross browser, SEO** friendly and ensuring a seamless user experience.

[UIHUT](#) *Web Developer*

06/2022 – 2/2023

Developed the frontend of Ezytor, a powerful website builder built with React JS. Ezytor empowers developers to create websites rapidly, allowing them to focus on functionality rather than design. Additionally, contributed to UIHUT projects using Vue js, Elementor widget development project. Also, created a catching UI theme for flowgiri.

[Avalon Hosting Services Ltd.](#) *jr. Frontend Developer*

07/2021 – 04/2022

Here my responsibility was to create ui design with pixel perfect. And I contribute company own hosting website Avalon Hosting services ltd. Besides I contribute to file converter web application and another rent related web application.

[Prayers Connect \(USA\)](#) *React Native Developer (volunteer)*

01/2022 – 03/2022

As part of an agile methodology team, collaborated on implementing new features and resolving bugs in a software project.
